## Defender Screens

D-Screen products function as glass “shields” between people, reducing the spread of bacteria and viruses, such as Covid-19 in commercial transactions.

They are self-standing products (placed using strong double-side sticky tape), creating a transaction opening at the bottom.

D-screen products are made of transparent laminate glass with polished edges, supported by cross-section aluminum columns with minimal intersection.

Glass is a non-porous material, with great durability over time, easy to clean with simple cleaners.

## Applications

Protective Screen between people to prevent the exchange of viruses.  
(exemplary applications: Retail, Banks, Pharmacies, Gas Stations, Offices)

## Technical Characteristics

- **Aluminum column**

Dimensions: 17x25mm / Standard height: 500mm

- **Glass panel**

4+4 laminate

- **Standard models length**

600 / 900 / 1200mm

- **Finishing**

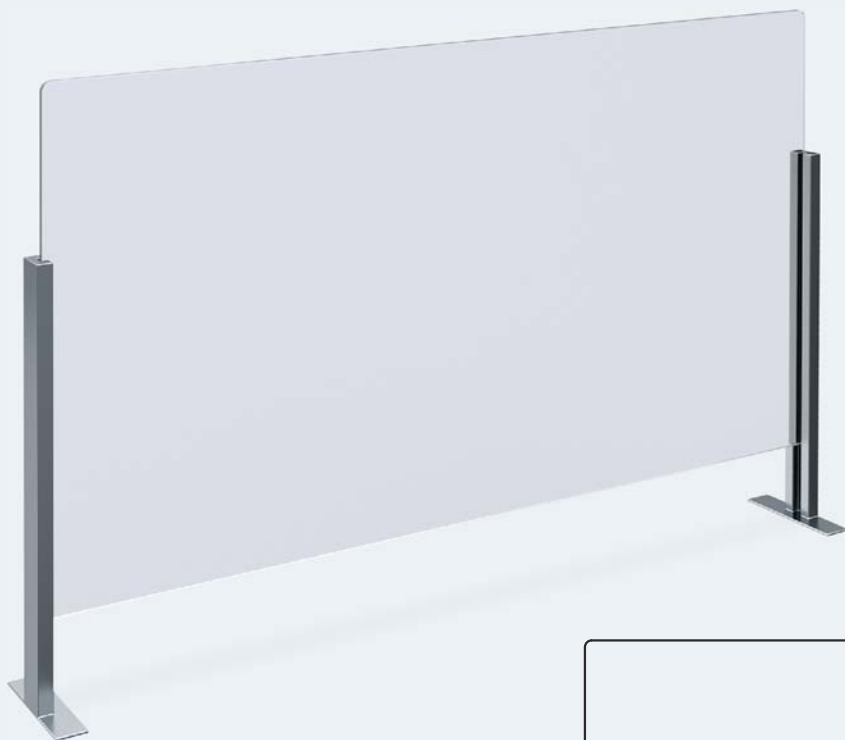

- Nature anodizing
- Black

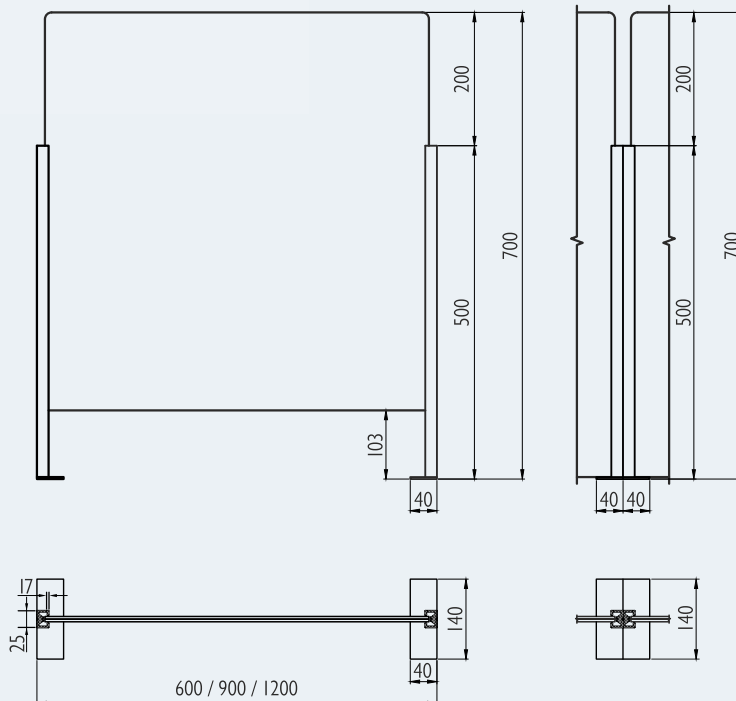

*Products can be in standard and nonstandard dimensions*

## Value-Added Benefits

- Frameless system, with minimal stand-off
- Easy-to-clean surface with common cleaners
- Great endurance over time **without fading**
- Easy assembly
- Portable
